## Top Price-performance Ratio: The New High-performance IP System Phones tiptel 3300

With the high-performance IP phone system tiptel 3300 the optimal supplement for the phone systems tiptel 8010/8020 All-IP is now available. The three phones tiptel 3320, tiptel 3330 and tiptel 3340 combine comprehensive comfort functions, a modern design and an excellent price-performance ratio. With the corresponding expansion module tiptel KD 40-33 the top model of the series, tiptel 3340, can be supplemented with additional function keys. The phones automatically provision with the phone system. Afterwards the user can profit from all comfort functions of the phones.

With the four function keys below the display the user has access to the call history, to all phonebooks of the PBX, to the answering machine and to all active call forwarding settings. Depending on the model, the user can select between 12 and 36 function keys for free allocation. The busy lamp field (BLF) shows the phone status of the office mates. Simple routing of phone calls is implemented. Also further functions as for example conversation recordings, speed dialing or intercom can be selected. The text length of the key labels can be adjusted according to individual demands

### Extra comfort due to separate keys for frequently used functions

Separate keys for frequently used functions make telephoning with the phones of the series tiptel 3300 a comfort experience. Thus, the phones allow the user to easily switch between the operations handset, hands-free and headset just as well as call conversion, redialing and answering machine. Additional, the tiptel 3330 and 3340 come with keys for conference call and call holding.

By means of the already integrated CTI software and the dashboard of the tiptel 8010/8020 All-IP all functions of the phone can also be used on the PC.

All three phones of the 3300 series can be run with a wired headset, the tiptel 3330 and 3340 optional can also be used with a wireless headset.
